Est. 1994

ECOsmarte's Rainwater, Cistern or Grey Water System Recirculation Model

30,000 Gallon Holding Capacity
Retail Price - \$12,995

- **1 ECOsmarte DC Voltage Control Box**

- WQA GOLD SEAL listed component.
- A DC voltage controller that energizes only when water is flowing by communicating to the Pentair Water Valve and the ECOsmarte Anode Chamber.

- **1 ECOsmarte Copper/Oxygen Anode Chambers (Sch40)**

- One pair of self-sacrificing copper plates to generate low level .1ppm to .2ppm copper to travel in the water from point-of-entry to point-of-use.
- One pair of titanium/platinum anodes to generate O2 oxygen. The oxygen makes heavy metals and inorganic chemicals easier to filter.

- **1 TA 100 Pentair Sand Filter (600 LB)**

- Glass Pack® Filter Media
- Top Mount Multiport Backwash Valve w/ Gauge

- **1 Pentair 2850 SXT Programmable and Metered Water Valve**

- WQA GOLD SEAL listed component.
- The Pentair Digital SXT Metered Water Valve and Media Tank communicate directly with the ECOsmarte Valve and Meter.
- The system rinses every 500 to 1500 gallons with no brine or chloride discharge and is compliant with current and proposed County and State bans on chloride discharge.

**Glass
Pack®**
